FinTech Banking

Our customer desired banking software that would simplify money transfers for enterprises and end users.

They wanted consumers to connect their dale accounts with their conventional bank accounts for an efficient and reliable cash flow using all of the latest FinTech capabilities.

With a team of highly trained engineers dedicated solely to Dale, Hashmaker Solutions took full responsibility for designing, creating, and training staff on the new specialized fintech banking application.

Technologies:

.NET Core

Features:

- Funds transfer within dale! accounts.
- Send a charge request.
- ATM withdrawal
- Cash-in from credit cards.
- Cash-in from Pagos Seguros en Línea (PSE)
- Cash-in from other Aval accounts.
- Cash-out to Aval banks.
- Merchant APIs for Businesses.
- Integration with e-commerce websites.

SaaS

Home Improvement

Our customer in the United States was searching for cloud-based software to create a business solution for home and field service companies to save paperwork and market their business through internet channels.

Hashmaker Solutions developed a cloud-based SaaS solution that provides a streamlined process for creating visits and jobs, saving customer information and history, sending estimates for customer approval, dispatching jobs to employees and tracking their work and monitoring the leaderboard, sending invoices to customers, and accepting credit card payments.

Features:

- Business Statistics
- Online Bookings
- Email/SMS notifications
- Scheduling and dispatch
- Customer records
- Employee performance records
- Automated Invoices and estimates
- Safe payment methods
- Intuitive user interface
- High scalability

Banking

Business Banker, a Cognitive Group product is an all-in-one platform that helps institutions process their business loans from initiation to closing. Everyone is on the same page and sees what needs to be accomplished.

Business Banker is designed the way bankers think, It is user-friendly and incorporates functions that are normally distributed over several applications. This synergy makes it possible to integrate information between credit applications, risk ratings, and securities.

Hashmaker Solutions took the responsibility for developing the multilayer complex banking functionality and currently is responsible for the maintenance of the platform.

Features:

- Dynamic Loan Forms Builder
- Risk Assessment
- Margining Loans
- Digital Documents Signature (DocuSign)
- Asset to Liability Loan Assessment
- Third Party integrations

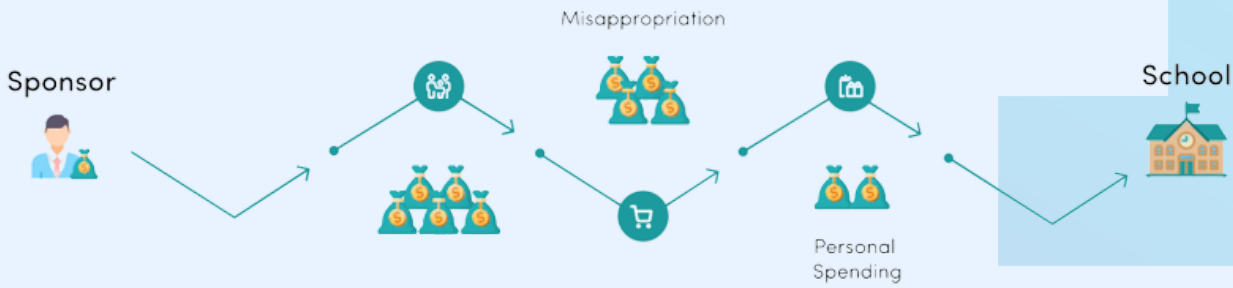
Nakupa

FinTech **Money Transfer**

TRADITIONAL WAY



Nakupa is a fintech solution for African schools, students, and sponsors. Nakupa facilitates Africans in the US, Europe, and even in Africa to send money intended for education directly to a school to support a student.

Hashmaker Solutions was approached with nothing more than an idea. The team designed and built the system from the ground up and is responsible for its maintenance and support.
